

NAUNTON PARK ENHANCEMENTS

What is Happening at Naunton Park?

Following discussions with the Friends of Naunton Park, local ward councillors and comments from park users, Cheltenham Borough Council are looking to carry out a series of enhancement works at Naunton Park. This display presents the works to be undertaken, these consist of the following:

- Installation of a new fully accessible, **SELF-BINDING GRAVEL PATH** (to match the section installed between the car park and play area) around the perimeter of the existing site with new and improved **SEATING AREAS** - this will create a continuous circular path around the park
- Currently, the land at Naunton Park does not drain properly, thus a **SHALLOW DEPRESSION (SWALE)** in the northern corner of the site has been proposed to collect surface water. Generally this feature will be dry however, following periods of heavy rainfall it will collect water and discharge into the drainage system. The swale will be approx 1m deep with gently sloping grass banks.
- Creation of a **GENTLE SLOPING MOUND** to provide an informal play mound - the mound will use all excavated material from the construction works meaning no waste will leave site
- **WILDFLOWER PLANTING** to attract pollinators - part of Cheltenham Borough Councils bee and butterfly incentive
